SEBERANG PERAI TENGAH**

Bismillahir Rahmanir Rahim

Assalamu'alaikum Warahmatullahi Wabarakatuh,

Good afternoon, Salam Sejahtera, Salam Penang2030 dan Salam Malaysia MADANI,

1. ***Alhamdulillah***, all praise to Allah S.W.T., for His grace and blessings, we are able to gather herein this meaningful afternoon for the Launching Ceremony of the CSR Water Restoration Program at Upcycle Park, Bandar Perda, Majlis Bandaraya Seberang Perai, in collaboration with Micron Memory Malaysia Sdn. Bhd.
2. On behalf of Majlis Bandaraya Seberang Perai (MBSP), I would like to extend my highest appreciation and sincere gratitude to Yang Berhormat Tuan H'ng Mooi Lye for his presence in officiating this significant event.
3. My deepest appreciation also goes to Mr. Amarjit Sandhu and Micron Memory Malaysia Sdn. Bhd. for their strong commitment and strategic collaboration with MBSP, including their generous sponsorship of RM5.9 million for this program. I would also like to thank all distinguished guests for your presence and support this afternoon.

Distinguished guests, ladies and gentlemen,

4. This afternoon, we are not merely launching a program; we are setting in motion a wave of transformation. A transformation in how we perceive, value, and protect water, the very lifeline of our existence.

5. This CSR Water Restoration Program represents our collective realization that water is not just a resource; it is a trust. A trust that we must preserve, protect, and pass on to future generations.
6. The collaboration between MBSP and Micron Memory Malaysia Sdn. Bhd. reflects a powerful and forward-looking partnership; where the public and private sectors come together, not only to drive economic growth, but to safeguard our environment.
7. It clearly demonstrates that when expertise meets commitment, the impact can be truly transformative.
8. This program is guided by clear and purposeful objectives: to raise public awareness on water conservation, to restore water quality in targeted areas, to strengthen public-private collaboration, and to support the sustainable development agenda of the State of Penang.
9. The project, with a total investment of RM5.9 million, leverages advanced technology and robust monitoring systems to ensure that treated water meets, at a minimum, the standards set by Malaysia's Department of Environment Water Quality Index.
10. It will focus on restoring water ecosystems at the MBSP Upcycle Park and the Bandar Perda Monsoon Drain.
11. More impressively, this initiative is expected to restore approximately 3.3 million cubic meters of water annually; an achievement that is not

only significant in scale, but deeply meaningful for our environmental future.

Distinguished guests,

12. Imagine this; water that was once polluted, now restored. Areas that were once neglected, now transformed into symbols of hope. Communities that were once unaware, now becoming agents of change.
13. This is the true “wow factor” of this program; not just physical transformation, but a transformation of mindset, awareness, and shared responsibility.
14. Because ultimately, the success of this initiative does not depend on technology or funding alone. It depends on the continuous commitment of all of us; government, industry, and community; working together to protect our environment.
15. I sincerely hope that this program will serve as a catalyst for many more impactful initiatives in the future.
16. May partnerships like this continue to grow stronger, expand further, and become a model for sustainable development; not only in Seberang Perai, but across Malaysia.

17. I also hope that the local community will embrace this program as a platform for learning and awareness; and become active partners with MBSP in preserving our environment.
18. Because sustainability is not the responsibility of one party; it is a shared responsibility for all of us.

Distinguished guests, ladies and gentlemen,

19. Before I conclude, I would like to express my sincere appreciation to the Penang State Government for its continuous support in advancing initiatives such as this, in line with the Penang2030 vision towards sustainable development and the well-being of the people.
20. Let us move forward together with a shared commitment; to transform Seberang Perai into a livable, sustainable, inclusive, green, competitive, and smart city. A city we can be proud of; today and for generations to come.
21. May this noble effort be blessed and stand as a lasting legacy for the future.

Thank you.

***Wabillahi Taufik Wal Hidayah, Wassalamualaikum Warahmatullahi
Wabarakatuh.***
